

# Timespace Reviewer

DELIVERING SECURITY

The Timespace X301 Reviewer ensures a crystal clear view of events as they unfold, the large sharp screen bringing the full scene to life in the hands of the operator. The reviewer's interface maximises the powerful features of the X300 and V400 recorders. With in-built PTZ camera control and current support for both VISCA and PELCO protocols, there is no need for the additional expense of a PTZ interface control box.

Designed with operations in mind, the reviewer is protected by a rubberised casing and scratch resistant window for reliable operation, even in the toughest of applications. Recorder set-up and operation is intuitive and user friendly, with live display of critical events, instant PTZ camera control and playback of recorded footage using the concise and clear colour coded keys.

High quality D1 recordings maximise the benefit of the X301 Reviewer's digital zoom feature, bringing detail to life with the cursor keys allowing the full screen to be navigated and viewed.

## Operation

- Large 5 inch back light screen
- In-built speaker for audio playback
- 3.5mm headphones audio out jack
- Stand for simple operation.
